

CoverBlast®

HOSE REPLACEMENT NOZZLE

Scan for
Video

The CoverBlast® pool cover pump attachment eliminates the garden hose from the pool. Simply attach to pool cover pump, place on pool cover and aim. CoverBlast® will shoot the water up to 25 feet away from the pool when attached to a 1800 GPH pool cover pump. It features a compact design that allows it to remain attached to the cover pump while not in use and will not freeze during the winter months.

Replaces Garden Hose • Does Not Freeze • Stores Attached to Pump • Compact Design • Shoots 25 Feet
